Test results — Aletheia -> ODIN Bridge v0.1

The bridge converts a verified Aletheia Evidence Bundle v0.1 into an ODIN Claim Reasoner v0.1 claim set (integrity/presence claims only), writes a deterministic output folder, and verifies it. Standard library only. It converts integrity metadata only — never truth of contents. All commands below were run from a **clean extraction** of `aletheia_odin_bridge_v01.zip`.

Authoritative freeze gate — each command passes individually (clean extraction)

The freeze gate is the explicit list of individual commands (see RELEASE_COMMANDS.md) plus the static manifest check. No wrapper orchestrator is in
the gate; the default unit suite uses in-process fakes for the Aletheia/ODIN boundaries, so the gate spawns no subprocesses.

Command	Result
`python3 -m compileall -q .`	PASS
`python3 -m unittest discover -s tests -v`	PASS — 62 tests, ~0.3s
`python3 -O -m unittest discover -s tests -v`	PASS — 62 tests
`python3 selfcheck.py`	PASS — 8/8 gates
`python3 -O selfcheck.py`	PASS — 8/8 gates
`python3 -W error::ResourceWarning -m unittest discover -s tests`	PASS
`sha256sum -c aletheia_odin_bridge_v01.sha256`	OK
`python3 verify_release_manifest.py`	PASS — 8/8 static checks, **no subprocesses**

Required behaviours (all covered)

#	Required test	Where
1	Valid Aletheia manifest accepted	`test_manifest_reading.py::test_1_valid_manifest`
2	Missing manifest field refused	`::test_2_missing_field_refused`
3	Extra manifest field (subset validation boundary)	`::test_3_extra_field_tolerated_by_subset_valida`
4	Non-VERIFIED_PRESENT manifest refused	`::test_4_non_verified_present_refused` + `test_co`
5	Missing Aletheia bundle refused	`test_convert.py::test_5_missing_bundle_refused`
6	Aletheia verify failure refused	`::test_6_aletheia_verify_failure_refused`
7	Missing Aletheia root refused	`::test_7_missing_aletheia_root_refused`
8	Missing ODIN root refused	`::test_8_missing_odin_root_refused`
9	Claims generated canonically	`test_claim_builder.py::test_9_claims_generated_`
10	Exactly two claims generated	`::test_10_exactly_two_claims`
11	Only evidence.present + evidence.integrity_verified	`::test_11_only_allowed_predicates`
12	Support preserves evidence ID	`::test_12_support_preserves_evidence_id`
13	Support SHA equals bundled SHA	`::test_13_support_sha_equals_bundled_sha`
14	No truth predicates generated	`::test_14_no_truth_predicates` + `test_honesty.py`
15	ODIN validation failure refused	`test_convert.py::test_15_odin_validation_failur`
16	Valid conversion writes all files	`::test_16_valid_conversion_writes_all_files`

#	Required test	Where
17	bridge_report.json canonical	`::test_17_bridge_report_canonical`
18	bridge_checksums.txt written	`::test_18_checksums_written`
19	Verify valid bridge output succeeds	`test_verify.py::test_19_verify_valid_output_suc`
20	Mutated odin_claims.json fails	`::test_20_mutated_claims_fails`
21	Mutated bridge_report.json fails	`::test_21_mutated_report_fails`
22	Mutated aletheia_manifest_copy.json fails	`::test_22_mutated_manifest_copy_fails`
23	Missing checksums fails	`::test_23_missing_checksums_fails`
24	Duplicate checksum key fails	`::test_24_duplicate_checksum_key_fails`
25	Unknown checksum key fails	`::test_25_unknown_checksum_key_fails`
26	Unknown extra output file fails	`::test_26_unknown_extra_file_fails`
27	Report claim count mismatch fails	`::test_27_report_claim_count_mismatch_fails`
28	Report case ID mismatch fails	`::test_28_report_case_id_mismatch_fails`
29	Claim support SHA mismatch fails	`::test_29_support_sha_mismatch_fails`
30	Truth-like predicate injected fails	`::test_30_truth_predicate_injected_fails`
31	Non-canonical JSON fails	`::test_31_non_canonical_json_fails`
32	Selfcheck passes	`test_selfcheck.py::test_32_selfcheck_passes_in_`
33	No bare runtime asserts	`test_no_bare_asserts.py::test_33_no_bare_assert`

#	Required test	Where
34	`python -O` unchanged behaviour	full suite + selfcheck pass identically under `-O`
35	manifest verifier passes, no subprocesses	`test_no_bare_asserts.py::test_35_manifest_verif`

Additional coverage: CLI-level exit codes (0 success, 2 path error, 1 Aletheia/ODIN failure) with injected fakes; ODIN validation SKIPPED when no `--odin-root`; no evidence file copied; non-empty output dir refused; manifest copy matches source; evidence_id mismatch fails; missing run dir fails; the claim-builder guard rejects forbidden predicates directly.

Manual integration smoke test (NOT part of the freeze gate)

Against the real frozen Aletheia v0.1 and ODIN v0.1: built an evidence bundle; `bridge.py convert` produced `bridge_status = CONVERTED` with `odin_validation_status = VALID` and generated exactly `evidence.present` + `evidence.integrity_verified`; `bridge.py verify` passed; ODIN `reason` over the generated claims returned `reasoning_status = CONSISTENT`; ODIN `verify` passed.

Scope

Aletheia evidence manifest -> ODIN integrity/presence claims -> bridge report. Nothing else. Not connected to the workflow. No new features beyond the spec.
