Test results — ODIN Claim Reasoner v0.1

ODIN Claim Reasoner v0.1 reasons deterministically over already-structured claims: it validates a claim set, detects direct structural contradictions, preserves support references, and emits a canonical reasoning report and proof trace. Standard library only. It proves structural consistency only — never truth. All commands below were run from a **clean extraction** of `odin_claim_reasoner_v01.zip`.

Authoritative freeze gate — each command passes individually (clean extraction)

The freeze gate is the explicit list of individual commands (see RELEASE_COMMANDS.md) plus the static manifest check. No wrapper orchestrator is in
the gate.

Command	Result
`python3 -m compileall -q .`	PASS
`python3 -m unittest discover -s tests -v`	PASS — 70 tests, ~0.16s
`python3 -O -m unittest discover -s tests -v`	PASS — 70 tests
`python3 selfcheck.py`	PASS — 8/8 gates
`python3 -O selfcheck.py`	PASS — 8/8 gates
`python3 -W error::ResourceWarning -m unittest discover -s tests`	PASS
`sha256sum -c odin_claim_reasoner_v01.sha256`	OK
`python3 verify_release_manifest.py`	PASS — 8/8 static checks, **no subprocesses**

Required behaviours (all covered)

#	Required test	Where
1	Valid claim set accepted	`test_claim_schema.py::test_1_valid_claim_set_a`

#	Required test	Where
2	Missing claims field refused	`::test_2_missing_claims_field_refused`
3	Extra top-level field refused	`::test_3_extra_top_level_field_refused`
4	Duplicate claim ID refused	`::test_4_duplicate_claim_id_refused`
5	Unsafe claim ID refused	`test_validation.py::test_5_unsafe_claim_id_ref`
6	Unsafe support ID refused	`::test_6_unsafe_support_id_refused`
7	Empty support list refused	`test_claim_schema.py::test_7_empty_support_lis`
8	Invalid polarity refused	`::test_8_invalid_polarity_refused`
9	Float object refused	`::test_9_float_object_refused`
10	Consistent claims produce CONSISTENT	`test_reasoning.py::test_10_consistent_claims_p`
11	Different-object contradiction detected	`::TestContradictions::test_11_different_object_`
12	Opposite-polarity contradiction detected	`::test_12_opposite_polarity_contradiction`
13	Separate subjects accepted	`::test_13_non_contradictory_separate_subjects`
14	Separate predicates accepted	`::test_14_non_contradictory_separate_predicate`
15	Proof trace deterministic	`test_proof_trace.py::test_15_proof_trace_gener`
16	Report canonical JSON	`test_reasoning.py::test_16_report_is_canonical_`
17	Checksums file written	`::test_17_checksums_file_written`
18	Verify valid output succeeds	`test_verify.py::test_18_verify_valid_output_su`
19	Mutated claims fails verify	`::test_19_mutated_claims_fails`
20	Mutated report fails verify	`::test_20_mutated_report_fails`
21	Mutated proof trace fails verify	`::test_21_mutated_proof_trace_fails`
22	Missing checksums fails verify	`::test_22_missing_checksums_fails`

#	Required test	Where
23	Duplicate checksum key fails	`::test_23_duplicate_checksum_key_fails`
24	Unknown checksum key fails	`::test_24_unknown_checksum_key_fails`
25	Unknown extra output file fails	`::test_25_unknown_extra_file_fails`
26	Report contradiction count mismatch fails	`::test_26_report_contradiction_count_mismatch_`
27	Proof trace unknown claim ID fails	`::test_27_proof_trace_unknown_claim_id_fails`
28	CONTRADICTION_DETECTED is not a truth claim	`test_no_bare_asserts.py::TestHonesty::test_28_`
29	Aletheia import creates only integrity/presence claims	`test_aletheia_import.py::test_29_...`
30	Aletheia import refuses non-VERIFIED_PRESENT	`::test_30_import_refuses_non_verified_present`
31	Selfcheck passes	`test_selfcheck.py::test_31_selfcheck_passes_in`
32	No bare runtime asserts	`test_no_bare_asserts.py::test_32_no_bare_asser`
33	`python -O` unchanged behaviour	full suite + selfcheck pass identically under `-O`
34	manifest verifier passes, no subprocesses	`test_no_bare_asserts.py::test_34_manifest_veri`

Additional coverage: bool/int and null/false object distinction; three-way pairwise contradictions; different-object precedence over opposite-polarity; order-independent detection; status-mismatch detection; non-empty output dir refused; support references preserved on import; import refuses missing fields / unsafe IDs / bad sha; sha256 validator rejects uppercase and wrong length.

Manual smoke test (NOT part of the freeze gate)

Building the example `claims.json` and running `reason` then `verify` yields `reasoning_status = CONSISTENT`, `contradiction_count = 0`, and the ODIN output verifies. Confirmed end to end, including the optional `import-aletheia` against a real Aletheia v0.1 `VERIFIED_PRESENT` manifest (produces `evidence.present` + `evidence.integrity_verified` claims that reason as CONSISTENT).

Scope

Structured claims → deterministic validation → direct contradiction detection → canonical proof trace. Nothing else. Not connected to the workflow. No new features beyond the spec.
