Test results — Histor-lite Aletheia Importer v0.1

The importer records a verified Aletheia Evidence Bundle v0.1 as a Histor-lite-style evidence case, and verifies it. Standard library only. It records integrity metadata only — never that the evidence contents are true. All commands below were run from a **clean extraction** of `histor_lite_aletheia_importer_v01.zip`.

Authoritative freeze gate — each command passes individually (clean extraction)

The freeze gate is the explicit list of individual commands (see RELEASE_COMMANDS.md) plus the static manifest check. No wrapper orchestrator is in
the gate; the default unit suite uses an in-process fake Aletheia verifier, so the gate spawns no subprocesses.

Command	Result
`python3 -m compileall -q .`	PASS
`python3 -m unittest discover -s tests -v`	PASS — 68 tests, ~0.28s
`python3 -O -m unittest discover -s tests -v`	PASS — 68 tests
`python3 selfcheck.py`	PASS — 8/8 gates
`python3 -O selfcheck.py`	PASS — 8/8 gates
`python3 -W error::ResourceWarning -m unittest discover -s tests`	PASS
`sha256sum -c histor_lite_aletheia_importer_v01.sha256`	OK
`python3 verify_release_manifest.py`	PASS — 10/10 static checks, **no subprocesses**

Required behaviours (all covered)

#	Required test	Where
1	Valid Aletheia manifest accepted	`test_aletheia_reader.py::test_1_valid_manifest_accepte`
2	Missing Aletheia root refused	`test_importer.py::test_2_missing_aletheia_root_refused`
3	Missing bundle folder refused	`::test_3_missing_bundle_refused`
4	Aletheia verify failure refused	`::test_4_aletheia_verify_failure_refused`
5	Non-VERIFIED_PRESENT status refused	`::test_5_non_verified_present_refused` + reader test
6	Missing manifest field refused	`::test_6_missing_manifest_field_refused`
7	Invalid case_id refused	`test_validation.py::test_7_invalid_case_id_refused`
8	Invalid evidence_id refused	`::test_8_invalid_evidence_id_refused`
9	Non-empty output dir refused	`test_importer.py::test_9_nonempty_output_dir_refused`
10	Valid import writes all files	`::test_10_valid_import_writes_all_files`
11	Evidence file not copied	`::test_11_evidence_file_not_copied`
12	Summary canonical	`::test_12_summary_is_canonical`
13	Manifest copy canonical	`::test_13_manifest_copy_is_canonical`
14	Replay report written	`::test_14_replay_report_written`
15	Checksums written	`::test_15_checksums_written`
16	Verify valid case succeeds	`test_verify.py::test_16_verify_valid_case_succeeds`

#	Required test	Where
17	Mutated summary fails	`::test_17_mutated_summary_fails`
18	Mutated manifest copy fails	`::test_18_mutated_manifest_copy_fails`
19	Mutated replay report fails	`::test_19_mutated_replay_report_fails`
20	Missing checksums fails	`::test_20_missing_checksums_fails`
21	Duplicate checksum key fails	`::test_21_duplicate_checksum_key_fails`
22	Unknown checksum key fails	`::test_22_unknown_checksum_key_fails`
23	Malformed checksum digest fails	`::test_23_malformed_digest_fails`
24	Uppercase checksum digest fails	`::test_24_uppercase_digest_fails`
25	Unknown extra output file fails	`::test_25_unknown_extra_file_fails`
26	Case ID mismatch fails	`::test_26_case_id_mismatch_fails`
27	Evidence ID mismatch fails	`::test_27_evidence_id_mismatch_fails`
28	Source status mismatch fails	`::test_28_source_status_mismatch_fails`
29	Source file SHA mismatch fails	`::test_29_source_file_sha_mismatch_fails`
30	Bundled file SHA mismatch fails	`::test_30_bundled_file_sha_mismatch_fails`
31	Truth-like claim in summary fails	`::test_31_truth_like_claim_in_summary_fails`

#	Required test	Where
32	Truth-like claim in replay report fails	`::test_32_truth_like_claim_in_replay_report_fails`
33	`python -O` unchanged behaviour	full suite + selfcheck pass identically under `-O`
34	Selfcheck passes	`test_selfcheck.py::test_34_selfcheck_passes_in_process`
35	No bare runtime asserts	`test_no_bare_asserts.py::test_35_no_bare_asserts_in_ru`
36	manifest verifier passes, no subprocesses	`test_no_bare_asserts.py::test_36_manifest_verifier_pre`

Additional coverage: CLI-level exit codes (0 success, 2 path error, 1 Aletheia verify failure) with an injected fake verifier; status and both SHAs preserved through import; replay report contains both SHAs and the disclaimer; import_status mismatch fails; missing case dir fails; sha256 validator rejects uppercase / wrong length; malformed/uppercase digests and blank-line handling in checksums.

Manual integration smoke test (NOT part of the freeze gate)

Against the real frozen Aletheia v0.1: built an evidence bundle; `histor_aletheia.py import-evidence` produced `import_status = IMPORTED_VERIFIED_ALETHEIA`, `source_evidence_status = VERIFIED_PRESENT`, case_id / evidence_id / source_file_sha256 / bundled_file_sha256 all preserved, exactly the four case files written with `truth_claim: none` in the replay report; `histor_aletheia.py verify-case` passed.

Scope

verified Aletheia evidence metadata -> Histor-lite-style evidence case record -> verified imported case. Nothing else. Not connected to ODIN, Coordinator, or Companion. No new features beyond the spec.
