Test results — Histor-lite ODIN Importer v0.1

The importer records a verified ODIN Claim Reasoner v0.1 output as a Histor-lite-style reasoning case, and verifies it. Standard library only. It records structural reasoning metadata only — never that any claim is true. All commands below were run from a **clean extraction** of `histor_lite_odin_importer_v01.zip`.

Authoritative freeze gate — each command passes individually (clean extraction)

The freeze gate is the explicit list of individual commands (see RELEASE_COMMANDS.md) plus the static manifest check. No wrapper orchestrator is in
the gate; the default unit suite uses an in-process fake ODIN verifier, so the gate spawns no subprocesses.

Command	Result
`python3 -m compileall -q .`	PASS
`python3 -m unittest discover -s tests -v`	PASS — 76 tests, ~0.6s
`python3 -O -m unittest discover -s tests -v`	PASS — 76 tests
`python3 selfcheck.py`	PASS — 8/8 gates
`python3 -O selfcheck.py`	PASS — 8/8 gates
`python3 -W error::ResourceWarning -m unittest discover -s tests`	PASS
`sha256sum -c histor_lite_odin_importer_v01.sha256`	OK
`python3 verify_release_manifest.py`	PASS — 10/10 static checks, **no subprocesses**

Required behaviours (all covered)

#	Required test	Where
1	Valid ODIN run accepted	`test_odin_reader.py::test_1_valid_run_accepted`

#	Required test	Where
2	Missing ODIN root refused	`test_importer.py::test_2_missing_odin_root_ref`
3	Missing ODIN run folder refused	`::test_3_missing_run_refused`
4	ODIN verify failure refused	`::test_4_odin_verify_failure_refused`
5	Missing reasoning report refused	`test_odin_reader.py::test_5_missing_report_ref`
6	Missing proof trace refused	`::test_6_missing_proof_trace_refused`
7	Missing claims file refused	`::test_7_missing_claims_refused`
8	INVALID_INPUT status refused	`test_odin_reader.py::test_8` + `test_importer.py`
9	CONSISTENT status accepted	`test_odin_reader.py::test_9` + `test_importer.py`
10	CONTRADICTION_DETECTED accepted	`test_odin_reader.py::test_10` + `test_importer.p`
11	Invalid case_id refused	`test_validation.py::test_11_invalid_case_id_re`
12	Non-empty output dir refused	`test_importer.py::test_12_nonempty_output_dir_`
13	Valid import writes all files	`::test_13_valid_import_writes_all_files`
14	Copied ODIN files not rewritten	`::test_14_copies_not_rewritten`
15	Summary canonical	`::test_15_summary_is_canonical`
16-18	Copies canonical	`::test_16_17_18_copies_are_canonical`
19	Replay report written	`::test_19_replay_report_written`
20	Checksums written	`::test_20_checksums_written`
21	Verify valid case succeeds	`test_verify.py::test_21_verify_valid_case_succ`
22	Mutated summary fails	`::test_22_mutated_summary_fails`
23	Mutated report copy fails	`::test_23_mutated_report_copy_fails`

#	Required test	Where
24	Mutated proof trace copy fails	`::test_24_mutated_trace_copy_fails`
25	Mutated claims copy fails	`::test_25_mutated_claims_copy_fails`
26	Mutated replay report fails	`::test_26_mutated_replay_report_fails`
27	Missing checksums fails	`::test_27_missing_checksums_fails`
28	Duplicate checksum key fails	`::test_28_duplicate_checksum_key_fails`
29	Unknown checksum key fails	`::test_29_unknown_checksum_key_fails`
30	Malformed checksum digest fails	`::test_30_malformed_digest_fails`
31	Uppercase checksum digest fails	`::test_31_uppercase_digest_fails`
32	Unknown extra output file fails	`::test_32_unknown_extra_file_fails`
33	Case ID mismatch fails	`::test_33_case_id_mismatch_fails`
34	Reasoning status mismatch fails	`::test_34_reasoning_status_mismatch_fails`
35	Claim count mismatch fails	`::test_35_claim_count_mismatch_fails`
36	Contradiction count mismatch fails	`::test_36_contradiction_count_mismatch_fails`
37	Proof step count mismatch fails	`::test_37_proof_step_count_mismatch_fails`
38	Import status mismatch fails	`::test_38_import_status_mismatch_fails`
39	INVALID_INPUT injected after import fails	`::test_39_invalid_input_injected_fails`
40	Truth-like claim in summary fails	`::test_40_truth_like_claim_in_summary_fails`
41	Truth-like claim in replay report fails	`::test_41_truth_like_claim_in_replay_report_fa`

#	Required test	Where
42	`python -O` unchanged behaviour	full suite + selfcheck pass identically under `-O`
43	Selfcheck passes	`test_selfcheck.py::test_43_selfcheck_passes_ir`
44	No bare runtime asserts	`test_no_bare_asserts.py::test_44_no_bare_asser`
45	manifest verifier passes, no subprocesses	`test_no_bare_asserts.py::test_45_manifest_veri`

Additional coverage: CLI-level exit codes (0 success, 2 path error, 1 ODIN verify failure, 1 INVALID_INPUT) with an injected fake verifier; reasoning status and all counts preserved through import; verbatim source bytes captured by the reader; malformed report refused; other non-importable statuses refused; missing case dir fails.

Manual integration smoke test (NOT part of the freeze gate)

Against the real frozen ODIN v0.1:

- **Consistent run** -> `histor_odin.py import-reasoning` produced `import_status = IMPORTED_VERIFIED_ODIN`, `source_reasoning_status = CONSISTENT`, case_id / claim_count / contradiction_count / proof_step_count all preserved, the three ODIN copies byte-identical to the source files, `truth_claim: none` in the replay report; `histor_odin.py verify-case` passed.
- **Contradiction run** (two claims, same predicate, AFFIRMED + DENIED) -> ODIN yielded `reasoning_status = CONTRADICTION_DETECTED`; the importer produced `import_status = IMPORTED_VERIFIED_ODIN` with the contradiction status preserved;
  `verify-case` passed — confirming a structural contradiction is a valid reasoning outcome, not a failed import.

Scope

verified ODIN structural reasoning output -> Histor-lite-style reasoning case record -> verified imported reasoning case. Nothing else. Not connected to Aletheia, Coordinator, or Companion. No new features beyond the spec.
